Campsite Decorating Contest

Halloween is coming up, and we're so ready to begin our festivities! Get ready for some spooky, scary fun like trick-or-treating, scavenger walk, kids costume contests, and most importantly, our site decorating competition! This competition is voted on by the campers & staff! Top prize is a FREE Campsite for 2020, so everyone has a chance to win big! Keep reading to get inspired by these spooktacular decorating ideas!

October 26th

ALL GUESTS

*Riding or not everyone must be signed in upon arrival! The guest waiver is hanging on the wall of the office building 24/7. * This does not exclude members. Members must sign in every visit.

Hunting clubs lease Rausch Creek property each year and work hard on scouting for the perfect hunting spot, as well as, planting their food plots. ~~~Trailriders works hand in hand with the clubs to make sure they have proper "FREE" days to hunt and signage for our riders to stay off their plots. Sooo...please pay attention to signage as you embark on your fall riding this season.

Cinnamon Buns are BACK!!! They are ooey gooey GOOD!!

Due to climate change (just kidding) (not kidding about the price increase)

ICE has risen to \$3.00 a bag

**45 Days
'til the
Trick-or-Treat**

TIP OF THE DAY

Line the pathway to your cabin, RV, or tent with these multi-faced spirit jugs! Make them as creepy or silly as you want!

LOCAL TO DO'S

RARE "MICRO" HARVEST MOON

(CBS Local) — Skywatchers rejoice! Friday the 13th is your lucky day as a rare "Harvest" Moon will appear across the United States.

The Harvest Moon, which is the full Moon nearest the start of fall or the autumnal equinox — which this year takes place on September 23 — will be happening on Friday the 13th, according to the Farmers' Almanac.

Technically, a full Moon occurs at a specific moment. For those living in the Eastern Time Zone, this will be 12:33 a.m. on Saturday, September 14, but it will appear perfectly circular to our eyes from Thursday night through Sunday morning, according to NASA.

It is quite rare for the whole United States to experience a full moon on Friday the 13th, which is superstitiously known as an unlucky day. The last time it happened was on October 13, 2000. And if you miss this one, you'll have to wait nearly three decades for it to happen again on August 13th, 2049.

"Harvest" Moon got its name because the early-evening moonlight enables farmers to work later into the evenings at harvest time.

The upcoming Harvest Moon has also been referred to as a "micromoon" because it will appear around 14 percent smaller in the sky. This is because the moon is also nearing its apogee — the point in its nearly month-long elliptical orbit at which it is furthest away from Earth.

The moon will be at apogee on Friday, September 13, at 9:32 a.m. EDT. However, it will not appear significantly different in size to our eyes.

The opposite of a "micromoon" is a "supermoon" when the moon is at the closest point to the Earth in its orbit, called perigee.
